

BURBANK POLICE DEPARTMENT - TRAFFIC COLLISION REPORT

Report Number: BUR-2026-5521 Date: 03/19/2026 Time: 2106 hours

Location: 4th Street at Alameda Avenue, Burbank, CA

PARTIES

Party 1 (Driver): Aisha Khan, 2021 Mazda CX-5, plate 6HTL451, attempting a left turn from eastbound 4th St onto northbound Alameda Ave.

Party 2 (Driver): Tyler Brooks, 2018 Ford Mustang GT, plate 4RPW889, traveling westbound on 4th St (oncoming to P-1).

STATEMENTS

P-1 (Khan) stated: 'I had a green light and waited to turn left. The oncoming lane looked clear, then the Mustang appeared very fast out of nowhere. He must have been speeding - I never would have turned otherwise.'

P-2 (Brooks) stated: 'I had the green and the right of way going straight. She turned left right in front of me. I was doing the limit, maybe a little over.'

Witness W-1 (no independent witness located). The intersection has no traffic camera. Signal timing confirms both directions of 4th St had a circular green; there is no protected left-turn arrow.

OTHER ASSOCIATED FACTORS

Roadway was dry; lighting was dark with street lights. The posted speed limit on 4th Street is 35 mph. Skid analysis was inconclusive due to ABS. Estimated speed of P-2 from crush and roadway evidence ranged 38-52 mph - the range is too wide to establish a definitive speed.

OPINIONS AND CONCLUSIONS

This collision presents conflicting accounts. Party 1 may have failed to yield to oncoming traffic when making a left turn (CVC 21801). Party 2 may have been exceeding the basic speed law (CVC 22350). The available physical evidence does not conclusively establish which factor was primary; fault is contested. Reporting Officer: R. Avila, Serial 6620.
